### Education

Graduation in Biju  
Pattnaik Of University  
(BPUT), Odisha  
B.Techin Computer Science and  
Engineering  
Aug 2015-Oct 2019  
7.7 CGPA

### Technical Skills

- React.js
- Python
- Django, Rest Api
- Express.js
- MongoDB, PostgreSQL, MySQL
- Node.js
- HTML, CSS, Javascript
- Redux
- AWS, EC2, S3
- FastApi
- Flask

### Competencies

- Teamwork
- Self-motivation
- Adaptability
- Decision Making

### Languages

- Hindi
- English
- Odia

### Experience

Anand rathi wealth pvt ltd| Software Engineer(Jan 2024-Present) |Mumbai  
Have created Python Applications and developed for Indian oil corporation limited to update their retails data and third party integration using Flask and Sql Alchemy and libraries to enhance application functionality.

**Target Integration** | Trainee Software Developer(Dec 2022-Jan 2023) | Bang  
Developed new features and improved existing functionality in web applications collaborated with other developers and designed to deliver a high-quality product. Participated in code review to ensure code quality.

**IWCN**|Application Developer(Aug 2021-Nov 2022) | Agra  
Designed and created low latency API between frontend and backend and made dashboard And authentication of users using Python and React JS and implementing new features from scratch. Worked with large and small team sizes.

### Projects

**Project - WorkStation(Postgresql,Python,Flask,SQL Alchemy,React Js,Redux,AWS EC2,S3,API GATEWAY,Lambda) (AnandRathi wealth Pvt)**  
WorkStation is a product where it shows the information of client about equity, brokerage, mutual fund details .Improved **API performance** by fine-tuning **Postgresql** queries and **SqlAlchemy ORM** using **Flask** Integrated third-party **AccordApi**. Worked on the integration of backend and frontend and deployment using **AWS** and used **AWS S3,EC2,Lambda**. Utilized **Axios** to access **API information** for complex features on UI , in **frontend** using **React Js**

**Flamingo Rat || Node.js, Express.js, Mongo DB, React.js, Websocket, HTML, CSS, Javascript(Target Integration)**

It is an encryption and decryption system, so 2 windows one is for the client and another is for the server. So when the client messages something to the server will receive the message in encryption form. So server will decryption that message and read to understand what the client asked same thing the server will send the message in encryption and the client receives it and decryption that message.

**Cynthex || HTML | CSS || Javascript || Python || Django || React || Redux(IWCN)**

Cynthex is used for the management of user-side application. Cynthex works as a custom Django admin. It is easy to use and the admin will be able to manage all activities of users without having prior technical knowledge. Admin will be able to chat with the user and will be able to log out all user, disable and delete all users.
